

Year 11 Preliminary Textiles and Design

Teaching program v1.1 - implementation version

Course	Textiles and Design, 2-unit Preliminary, non-VET	Delivery	2026; 30 weeks; 120 indicative hours
Syllabus	Textiles and Design Stage 6 (2013) - current	Structure	Design 48 h Properties 60 h ATCFEI 12 h
Planning model	60 x 2-hour equivalent blocks	Lesson balance	34 Site/theory 14 Project/folio 12 Practical
Course projects	Two Preliminary textile projects required	Site state	15 complete learning modules with theory, checks, responses, video and presentation
Approval state	School-developed; local adaptation required; not NESA-approved	Publication	Student site authorised for public release

Implementation boundary: The two-hour blocks preserve the 120-hour syllabus total and the 40/50/10 allocation. Convert them to the actual school timetable before issue. Practical rows authorise no procedure: use only approved local briefs, demonstrations and WHS controls.

PRELIMINARY OUTCOMES - EXACT SYLLABUS WORDING

Code	Outcome	Code	Outcome
P1.1	describes the elements and principles of design and uses them in a variety of applications	P1.2	identifies the functional and aesthetic requirements and features of a range of textile items
P2.1	demonstrates the use of a variety of communication skills, including computer-based technology	P2.2	develops competence in the selection and use of appropriate manufacturing techniques and equipment
P2.3	manages the design and manufacture of textile projects	P3.1	identifies properties of a variety of fabrics, yarns and fibres
P3.2	justifies the selection of fabrics, yarns and fibres for end-uses	P4.1	identifies and selects textiles for specific end-uses based on analysis of experimentation
P5.1	examines the status of the Australian Textile, Clothing, Footwear and Allied Industries within the global context	P5.2	investigates the range of career options in design, consumerism, manufacturing and retail sectors of the Australian Textile, Clothing, Footwear and Allied Industries
P6.1	identifies and appreciates the factors that contribute to the quality and value of textiles in society		

TEACHER TO CONFIRM BEFORE USE

IDs	Area	Required confirmation
TTC-01	Timetable	Convert the 60 two-hour blocks to the local timetable before issue.
TTC-02-04	Practical authority	Approve both project packs and every testing method, equipment set, supervision and WHS control before use.
TTC-05	Assessment	Supply the current Textiles schedule and issue-ready notices; the 2026 Year 11 booklet omits this course.
TTC-07	Access and adjustments	Confirm current resources, copying permissions, student adjustments and access arrangements for this cohort.
TTC-08	Local approval	Approve this school-developed program and its local adaptations before implementation.

Teaching sequence - blocks 1-10

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
1	Site/ theory	Design brief and requirements	Teach Module 1 section 'Design purpose, users and requirements'; students view the design lens and complete the 10-question check.	Functional and aesthetic design; user, purpose, context and factors determining appropriate design.	Saved written response and Folio Card 1; P1.2.
2	Site/ theory	Elements of design	Teach 'Elements of design'; model evidence-based analysis; students complete the video prompt and 10-question check.	Line/direction, shape/size, texture, colour/value applied across textile applications.	Written analysis and Folio Card 2; P1.1.
3	Site/ theory	Principles of design	Teach 'Principles of design'; compare examples; students complete the video prompt and 10-question check.	Proportion, balance, rhythm, emphasis, contrast/harmony and unity.	Supported judgement and Folio Card 2; P1.1.
4	Project/ folio	Applied design analysis	Model the Design-analysis studio. Students analyse one textile item, improve the response and save the evidence.	Describe and analyse elements and principles; identify functional and aesthetic requirements.	Completed activity plus Folio Cards 1-2; P1.1, P1.2.
5	Site/ theory	Focus areas and design types	Teach with the completed Module 2 theory, checks and applied-practice activity.	Functional and aesthetic design across apparel, furnishings, costume, textile arts and non-apparel.	Comparison notes; P1.1, P1.2.
6	Site/ theory	Factors affecting design	Model how environmental sustainability and manufacturing techniques shape a design response.	Factors determining appropriate design; role of design in meeting functional and aesthetic requirements.	Evidence-based factor analysis; P1.2.
7	Site/ theory	Inspiration and development	Students compare inspiration sources and explain how a concept changes through feedback and constraints.	Generate, communicate, select and evaluate design ideas for a Preliminary textile project.	Annotated idea sequence; P1.1, P2.1.
8	Project/ folio	Project 1 design direction	Students record the user, purpose, requirements and one developed design direction in Folio Card 3.	Apply elements and principles; select, analyse and record design idea development.	Folio Card 3 checkpoint; P1.1, P1.2, P2.1.
9	Site/ theory	Manufacturing and pattern information	Teacher explains approved pattern information, symbols, measurements and quality checkpoints; use the completed site module.	Manufacturing methods; interpret, use and modify patterns for specific end-uses.	Pattern-reading check; P2.1, P2.2. TTC: TTC-02.
10	Project/ folio	Manufacturing plan	Students prepare a teacher-approved order of work and quality checkpoints without inventing technical details.	Outline and justify project development and management steps; communicate production information.	Approved plan and Folio Card 3; P2.1, P2.3. TTC: TTC-02.

Teaching sequence - blocks 11-20

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
11	Practical	Approved technique sample 1	Teacher demonstrates the authorised technique and controls. Students practise under supervision and retain one labelled sample.	Select and use manufacturing techniques appropriate to fabric and end-use.	Teacher-observed sample; P2.2. TTC: TTC-02.
12	Practical	Approved technique sample 2	Students repeat or extend an authorised technique, check quality and record one improvement.	Develop competence with appropriate manufacturing techniques and equipment.	Improved sample and feedback record; P2.2, P2.3. TTC: TTC-02.
13	Site/ theory	Drawing and annotation	Teacher models object, fashion and production drawing conventions from authorised course sources.	Graphical communication: object, fashion and industry production drawing specifications.	Annotated communication sample; P2.1.
14	Site/ theory	Audience, purpose and medium	Compare verbal, written, graphical and digital methods; students select a method for a defined audience.	Criteria for effective verbal and written communication; communication-based technologies.	Method selection explanation; P2.1.
15	Project/ folio	Production communication	Students create a teacher-approved drawing or annotated specification for Project 1.	Develop competence in graphically communicating design ideas using appropriate media.	Communication evidence in Folio Card 3; P2.1. TTC: TTC-02.
16	Project/ folio	Design review	Run a short peer/teacher review. Students document one supported change and update their project plan.	Communicate, evaluate and modify design ideas; manage time and resources.	Approved change record; P2.1, P2.3. TTC: TTC-02.
17	Project/ folio	Project 1 readiness	Check approved brief, design evidence, pattern, resources and sequence. Students identify the next authorised action.	Manage project development; evaluate ideas; plan time and resources.	Readiness checkpoint; P2.1, P2.3. TTC: TTC-02.
18	Practical	Project 1 manufacture - stage 1	Teacher demonstrates the approved stage. Students manufacture under supervision and complete clean-down.	Project construction using appropriate methods, techniques and equipment.	Progress photo/sample and teacher checkpoint; P2.2, P2.3. TTC: TTC-02.
19	Practical	Project 1 manufacture - stage 2	Students continue the approved sequence, check accuracy and respond to feedback.	Apply manipulative skills and manage the textile project.	Technique evidence in Folio Card 4; P2.2, P2.3. TTC: TTC-02.
20	Practical	Project 1 manufacture - stage 3	Students continue the approved sequence and record one quality issue or decision.	Use appropriate manufacturing techniques; manage time and resources.	Folio Card 5 change/checkpoint; P2.2, P2.3. TTC: TTC-02.

Teaching sequence - blocks 21-30

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
21	Practical	Project 1 manufacture - completion	Students complete the approved construction sequence and carry out teacher-directed quality checks.	Complete and evaluate a Preliminary textile project using appropriate methods.	Completed product evidence; P2.2, P2.3. TTC: TTC-02.
22	Practical	Project 1 evaluation evidence	Students photograph the authorised result, compare it with requirements and record a realistic improvement.	Evaluate ideas and project; substantiate conclusions with factual evidence.	Folio Card 6 evaluation; P1.2, P2.3, P4.1. TTC: TTC-02.
23	Site/ theory	Fibre classification	Teacher-led classification lesson using the approved properties booklet; use the completed site module.	Natural, regenerated and synthetic fibre types and classifications.	Classification map; P3.1.
24	Site/ theory	Molecular fibre structure	Explain monomer, polymer, amorphous and crystalline regions with verified diagrams.	Molecular structure and its contribution to fibre properties.	Labelled explanation; P3.1. TTC: TTC-07.
25	Site/ theory	Morphological fibre structure	Compare surface and cross-sectional features, staple, filament and multifilament forms.	Morphological structure and its contribution to fibre properties.	Structure-property notes; P3.1, P3.2.
26	Project/ folio	Fibre-to-end-use reasoning	Students choose one verified fibre example and justify an end use using structure and properties.	Select fibres for specific end-uses using evidence about properties.	Folio Card 7 rationale; P3.1, P3.2.
27	Site/ theory	Natural cellulosic fibres	Teach cotton origin, structure, processing, properties and end-use from approved sources.	Properties of natural cellulosic fibre; cotton classification and performance.	Cotton evidence table; P3.1.
28	Site/ theory	Natural protein fibres	Teach wool origin, structure, processing, properties and end-use from approved sources.	Properties of natural protein fibre; wool classification and performance.	Wool evidence table; P3.1.
29	Site/ theory	Manufactured fibres and blends	Compare viscose rayon, polyester, nylon, elastomeric and the required blends.	At least one regenerated, three synthetic fibres and two fibre blends.	Comparison check; P3.1, P3.2.
30	Project/ folio	Fibre selection	Students justify one natural and one manufactured fibre or blend for contrasting end uses.	Describe fibre properties and justify fibre selection for end-use.	Folio Card 7 comparison; P3.1, P3.2.

Teaching sequence - blocks 31-40

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
31	Site/ theory	Staple-spun and filament yarns	Compare staple-spun and filament construction and apply correct terminology.	Spun staple and filament yarn structure and characteristics.	Yarn classification notes; P3.1.
32	Site/ theory	Twist and spinning systems	Explain low/high twist and carded/combed or woollen/worsted distinctions.	Twist level and spinning systems that affect yarn and fabric properties.	Structure-property explanation; P3.1.
33	Site/ theory	Textured and novelty yarns	Identify textured, slub, boucle and core-spun examples from verified sources or teacher samples.	Textured and novelty yarn structures and characteristics.	Identification evidence; P3.1. TTC: TTC-07.
34	Project/ folio	Yarn structure evidence	Students select one yarn structure and explain how it contributes to fabric behaviour.	Identify yarn characteristics that affect fabric properties.	Folio Card 7 yarn record; P3.1, P3.2.
35	Site/ theory	Yarn aesthetic and comfort properties	Teach how yarn structure affects appearance, handle and comfort.	Yarn aesthetic and comfort properties and their effect on fabric performance.	Cause-effect notes; P3.1.
36	Site/ theory	Yarn durability, strength and care	Compare durability, strength and care demands using verified examples.	Yarn durability, strength and care properties.	Comparison response; P3.1.
37	Site/ theory	Structure-property relationships	Model a chain from fibre to yarn structure to fabric performance and end use.	Interrelationship of yarn structure, yarn properties and fabric performance.	Completed reasoning chain; P3.1, P3.2.
38	Project/ folio	Yarn end-use justification	Students justify a yarn selection for a specific textile end use using evidence.	Demonstrate understanding of yarn properties when selecting fabrics for end-use.	Folio Card 7 justification; P3.2.
39	Site/ theory	Woven structures	Teach warp, weft and selvedge, then compare plain, twill, satin, Jacquard, crepe and pile weaves.	Woven fabric structure, terminology, types and classification.	Woven comparison; P3.1.
40	Site/ theory	Knitted structures	Teach course and wale, then compare the required knitted fabric types.	Single, double, tricot, pile, lace and net knitted structures.	Knitted comparison; P3.1.

Teaching sequence - blocks 41-50

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
41	Site/ theory	Non-woven structures	Compare felt, web and film structures and link construction to likely performance.	Non-woven fabric structures, classification and properties.	Non-woven analysis; P3.1, P3.2.
42	Practical	Fabric structure identification	Using teacher-approved samples and method, students identify structure and record evidence rather than appearance alone.	Identify fabric structures and describe properties affected by structure.	Folio Card 7 sample record; P3.1, P3.2. TTC: TTC-04.
43	Site/ theory	Properties and end use	Compare aesthetic, durability, comfort, dimensional stability and care properties.	Fabric and fibre properties used when selecting fabrics for specific end-uses.	Property-to-end-use table; P3.1, P3.2.
44	Site/ theory	Planning a fair textile test	Model an aim, variables, consistent method, results table and evidence-based conclusion without supplying an unapproved method.	Use functional and aesthetic tests to record and evaluate results.	Fair-test plan; P4.1. TTC: TTC-04.
45	Project/ folio	Test plan and results structure	Students prepare Folio Card 8 fields and a teacher-approved recording format before testing.	Plan experimental procedures; communicate and record information.	Approved aim/variables/results table; P2.1, P4.1. TTC: TTC-04.
46	Practical	Authorised comparative textile test	Teacher demonstrates the approved method and controls. Students test, record results and clean down under supervision.	Evaluate fabric properties using classroom testing procedures.	Results and observations in Folio Card 8; P3.1, P4.1. TTC: TTC-04.
47	Project/ folio	Evidence-based Project 2 choice	Students analyse authorised test results and justify one fabric, yarn or fibre selection for the confirmed project.	Make decisions about textiles using analysis of properties and experimental evidence.	Folio Cards 8-9; P3.2, P4.1. TTC: TTC-03.
48	Practical	Project 2 manufacture - stage 1	Teacher demonstrates the approved Bustier/Vest stage. Students work under supervision and complete clean-down.	Project 2 construction using techniques appropriate to fabric and end-use.	Progress evidence; P2.2, P2.3. TTC: TTC-03.
49	Practical	Project 2 manufacture - stage 2	Students continue the approved sequence, check quality and record a supported decision.	Apply manipulative and management skills; communicate and record information.	Teacher checkpoint and Folio Card 9; P2.1, P2.2, P2.3. TTC: TTC-03.
50	Practical	Project 2 completion and evaluation	Students complete the authorised item, collect product evidence and evaluate design, selection and manufacture.	Evaluate textile selection and project outcomes using factual evidence.	Completed Folio Card 9; P2.3, P3.2, P4.1. TTC: TTC-03.

Teaching sequence - blocks 51-60

P	Type	Focus	Teaching and learning	Syllabus content	Evidence / outcomes
51	Site/ theory	Industry development and sectors	Use current primary evidence to outline one ATCFAl sector and its development; use the completed site module.	Role of textiles; sectors; development across the 19th, 20th and 21st centuries.	Verified sector timeline; P5.1. TTC: TTC-07.
52	Site/ theory	Local and global context	Compare Australian industry participation with global markets and identify one current issue using dated sources.	Contribution to local/global markets; issues, trends and future opportunities.	Source-based comparison; P5.1. TTC: TTC-07.
53	Site/ theory	Careers and training	Students investigate one current career pathway, required training and changing work context.	Current and future employment and training opportunities across ATCFAl sectors.	Career profile for Folio Card 10; P5.2. TTC: TTC-07.
54	Site/ theory	Quality assurance and control	Compare design, trademarks, fabric quality, legislation, assurance checks and control measures.	Influences on quality; methods of quality assurance in the marketplace.	Quality case notes; P6.1.
55	Site/ theory	Roles and value	Examine manufacturer/consumer roles and perceived, cultural and economic value.	Factors contributing to quality and value across textile end-uses.	Comparative value analysis; P6.1.
56	Project/ folio	Industry quality/value case	Students build one sourced case analysis and record title, organisation, date and location.	Investigate quality assurance and discuss factors contributing to textile value.	Completed Folio Card 10; P6.1. TTC: TTC-07.
57	Site/ theory	Design retrieval and response planning	Retrieve Design concepts, diagnose gaps and plan one supported response using command terms.	Design content from elements/principles through communication, manufacture and Project 1.	Low-stakes check and response plan; P1.1-P2.3. TTC: TTC-05.
58	Site/ theory	Properties retrieval and response planning	Retrieve fibre, yarn, fabric, testing and selection concepts; correct misconceptions.	Properties and Performance content; experimentation and end-use selection.	Low-stakes check and response plan; P3.1, P3.2, P4.1. TTC: TTC-05.
59	Site/ theory	Course synthesis	Students connect design, textile performance and industry/value in unfamiliar examples.	Integrated application of the three Preliminary areas of study.	Timed practice and feedback; P1.1-P6.1. TTC: TTC-05.
60	Project/ folio	Evidence and course review	Students check Folio Cards 1-10, identify incomplete evidence and prepare a personal revision priority list.	Evaluate and communicate project, experimental and industry evidence across the course.	Folio completeness record and next-step plan; P1.1-P6.1. TTC: TTC-05.
